4.3.4 User Login Page ('Booking Now' button)

This user login page appears when the customer clicks the 'booking now' button. However, users need to create an account before logging in and booking their wedding event. Then, if the user enters an incorrect username or password, an error message will appear, and the user will need to reenter the username and password. Furthermore, if the user doesn't have an account, they can click 'Create an Account!', and this link will navigate to the sign-up page.

4.3.5   Sign Up Page (Customer)
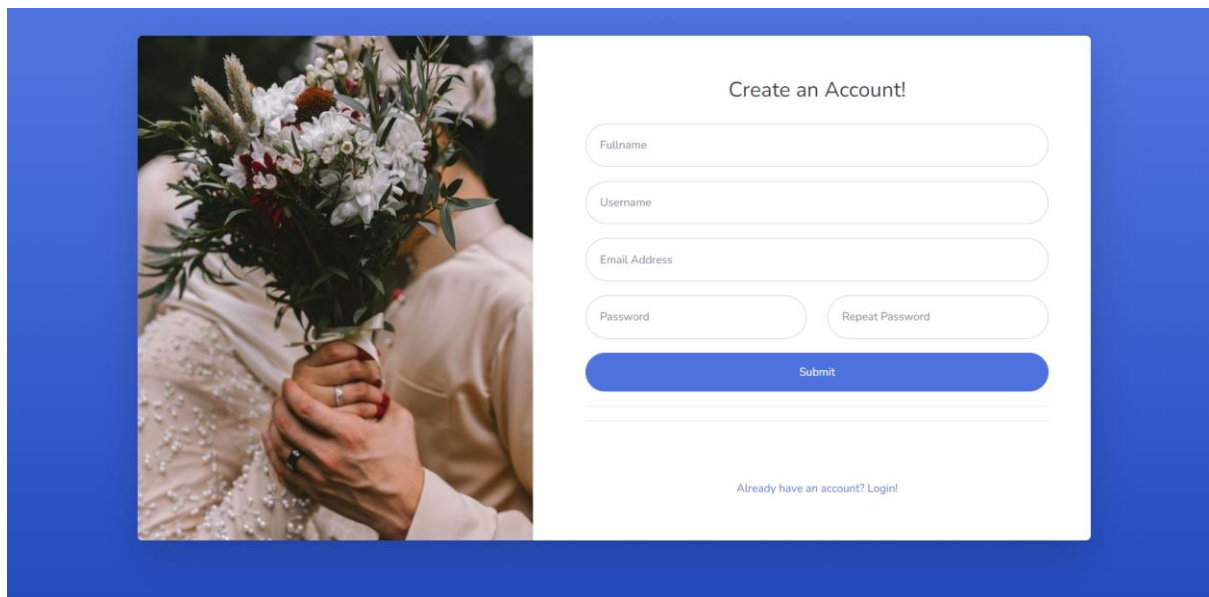

The sign-up page is only for users to register their accounts. Signing up requires the user to enter their full name, username, and email address in the correct format, as well as their password. Please make sure to enter the same password as the repeat password. After the user clicks submit, the account is already created. Then, the user can log in with their username and password that have already been created. 'Already have an account? Login', this link will navigate to the login page if the user already has an account.

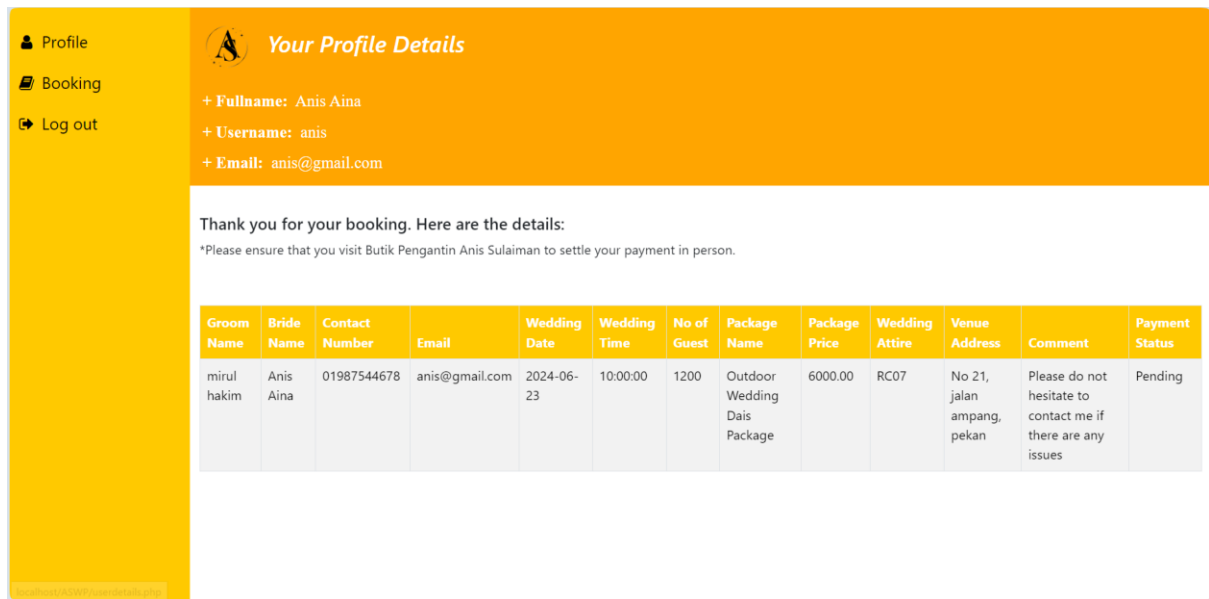

4.3.6   Profile Page (Customer)

This profile page will appear after the user successfully logs in with the correct username and password. This profile will show the full name, username, and email that the user registered. Furthermore, this page will show their booking history. Users can monitor their payment status to see if it is complete or not. This helps customers know their payment status and take action to make a payment at the counter if it is pending.

Groom Name	Bride Name	Contact Number	Email	Wedding Date	Wedding Time	No of Guest	Package Name	Package Price	Wedding Attire	Venue Address	Comment	Payment Status
mirul hakim	Anis Aina	01987544678	anis@gmail.com	2024-06-23	10:00:00	1200	Outdoor Wedding Dais Package	6000.00	RC07	No 21, jalan ampang, pekan	Please do not hesitate to contact me if there are any issues	Pending

4.3.7 Booking Form Page (Customer)

The booking form page required the user to fill in all the fields with the correct information. This is very important to make sure the future wedding event runs smoothly. Any mistake requires the user to take responsibility. In this form, the user is required user to enter the groom's name, bride's name, contact number, email (same with the email user used to register), choose one wedding package, wedding attire (specific code that is already stated on the packages page), venue address, and comment (optional).

4.3.8 Receipt Page (Customer)

After the user is done with the booking process, he or she can click the submit button, and this receipt page will appear. The receipt page, where all the information that the user submits, will be beautifully designed on this page. To close this page, the user just needs to click the done button to turn the profile page back on.

4.3.9   Admin Login Page

The admin doesn't need to register an account to access the admin login page because they already have a pre-determined username and password.
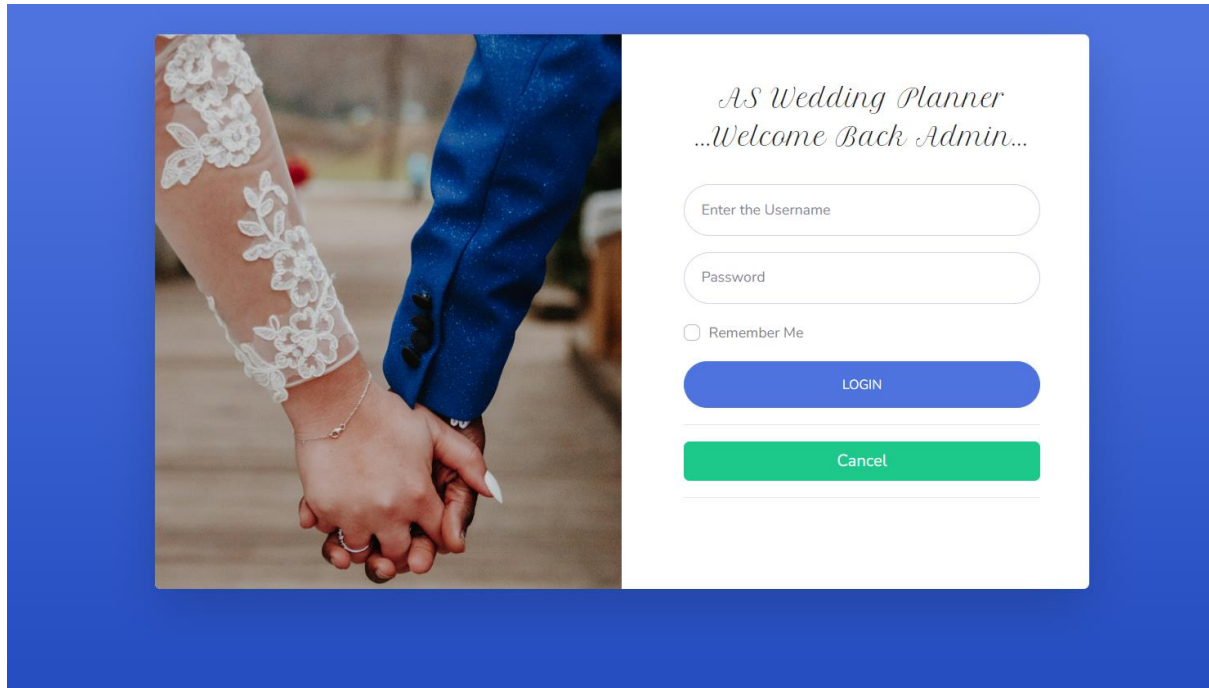

4.3.10 Customer Booking Details Page (Admin)

After the admin successfully logs in, the customer booking details page will display. On this page, the home menu will list all the customers who have already booked, and the admin has three actions that can take: view, update, and delete data customers. Furthermore, the admin can search customer data based on the groom's name, bride's name, contact number, date, and time. For the logout menu, navigate to the main page.

Here is the list of customers who have already booked.

ID	Groom Name	Bride Name	Wedding Date	Wedding Time	Payment Status	Action
6	mirul hakim	Anis Aina	2024-06-23	10:00:00	Pending	View Update Delete
7	Farhan Aniq	Puteri Aisha	2024-06-17	08:30:00	Done	View Update Delete

4.3.11 View Page

This page displays customer booking information for each customer because the customer's booking information page simply displays the ID, groom's name, bride's name, wedding date, wedding time, and payment status. The factor of the design is to lead to greater efficiency in managing customer data. After that, the admin can click the back button to return to the customer booking details page.
